SUMMARY

An Information Systems student at Universitas Multi Data Palembang with hands-on experience in Fullstack and Backend Web Development. Proficient in designing robust backend architectures, database management, and workflow optimization. Currently finalizing a production-level HRIS system as a graduation thesis project. Eager to contribute technical skills and deliver scalable solutions as a Backend or Fullstack Web Developer.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript
- **Backend & Frameworks:** Node.js, Express.js, Laravel, React, Next.js, Inertia.js
- **Databases & Caching:** MongoDB, PostgreSQL, MySQL, Redis
- **Tools & DevOps:** Docker, Git, Tailwind CSS

PROFESSIONAL EXPERIENCE

Web Developer (Internship / Undergraduate Thesis Project)

PT Zafa Mulia Mandiri | Palembang, Indonesia *February 2025 — Present*

- Developed a production-level Human Resource Information System (HRIS) web application as part of an institutional collaboration and final-year thesis project.
- Designed and implemented core modules including employee management, attendance tracking, leave requests, overtime, and a structured multi-level approval workflow.
- Engineered a robust backend architecture using Node.js and Express, implementing session-based authentication and role-based access control (RBAC).
- Optimized data persistence and real-time operations by utilizing MongoDB for main storage and Redis for caching purposes.

Web Developer (Contract / Kerja Praktik)

PT Changhong | Palembang, Indonesia *January 2025 — February 2025*

- Developed an internal incentive calculation system and automated backend services to streamline tracking for company promoters and field operations.
- Built responsive, user-friendly dashboard interfaces using React and integrated API endpoints using Express.js and Tailwind CSS.
- Optimized database interactions using MongoDB to ensure accurate, consistent, and scalable tracking of financial data.

SELECTED PROJECTS

Marketplace Jasa Receh – Solusi Kita Semua (*Web Development Competition Project*)

- Developed a web-based service marketplace platform using Laravel and MySQL/PostgreSQL in a collaborative team environment.
- Implemented real-time chat and notification features using Pusher, along with seller approval workflows and a dummy payment gateway.
- Built a role-based access control (RBAC) system for Admin, Seller, and Customer roles, integrated with geolocation-based service discovery.

Coffe – Palembang Coffee Map (*Independent Project*)

- Built a web-based directory platform using Next.js and TypeScript for interactive, vibe-based exploration of over 90 curated coffee shops in Palembang.
- Integrated interactive mapping technology powered by Leaflet to enable location-based search and dynamic cafe discovery.
- Designed a highly responsive UI/UX optimized for both desktop and mobile devices to improve digital accessibility.

EDUCATION Universitas Multi Data Palembang (UMDP)

2022 — August 2026 (*Expected Graduation*)

- Bachelor of Computer Science (S.Kom) – Information Systems Major
- Current GPA: 3.51 / 4.00 (Cumulative Semesters 1-7)

AWARDS & ACHIEVEMENTS

- **1st Place Winner** – UI/UX Competition at Rafatech, UIN Raden Fatah Palembang (*October 2025*)
